Version Control and Database Tools : GIT, GitHub, SQL, MySQL

Deployment Tools: Surge.sh, Netlify

Testing and Security: User Acceptance Testing (UAT), Securing the Software Development Lifecycle (SDLC)

PROJECTS

Portfolio Website | HTML, CSS, JavaScript, Bootstrap, Git, GitHub

- Designed and developed a responsive and visually appealing portfolio website to showcase projects, skills, and achievements.
- Implemented a user-friendly interface with interactive animations using HTML, CSS, and JavaScript, enhancing user engagement.
- Utilized Bootstrap for responsive design, ensuring accessibility and compatibility across multiple devices.
- Deployed the website using Git and GitHub, enabling seamless updates and version control.
- Optimized performance and applied modern UI/UX principles, leading to a 30% improvement in user interaction and session duration.

Task Management Application | React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Built a task management application for users to create, assign, and track tasks in real time using the MERN stack.
- Developed RESTful APIs with Node.js and Express.js for task creation, updates, and role-based access controls.
- Integrated JSON Web Tokens (JWT) for secure user authentication and session management.
- Implemented sorting and filtering features to organize tasks by priority, deadlines, and categories, increasing productivity by 40%.

CERTIFICATIONS

- React Web Development from Odin School.
- Developer from Accenture.
- Python from Udemy.
- Software Engineering from Wells Fargo.
- Business Intelligence and Data Analytics from Macquarie University.
